SUMMARY

Software Developer with over 11 years of experience, specializing in advanced Frontend architectures and the Vue.js ecosystem (Vue 3, Nuxt 3). Currently a Senior Consultant at Akkodis, working for global industry leaders in large-scale environments. Proven expertise in leading digital transformations, migrating legacy systems, and implementing modular architectures. Committed to high-quality code standards and fostering technical excellence within multidisciplinary teams.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer

Akkodis, August 2025 – Present

- Key member of a large-scale frontend department (20+ developers), specializing in high-traffic web platforms.
- Contributed to development of a modular architecture to ensure maintainability and scalability in a massive codebase.
- Maintained high-quality standards with a minimum 80% code coverage, utilizing SonarQube for continuous integration and code health monitoring.

Senior Frontend Developer

Bipi, August 2023 – August 2025

- Collaborates with multidisciplinary teams to ensure product quality and scalability (Nuxt and Vue 3) .
- Acts as a Software Product Engineer, focusing on identifying and solving problems to optimize the product.
- Contributed to the migration of the main dashboard from Vue 2 to Vue 3, improving performance and maintainability.

Team Lead

Código CA, September 2018 – August 2023

- Led the development team since 2019, managing technological projects and driving the company's digital transformation.
- Implemented solutions that replaced Excel-based processes, including an integrated app for client management, invoicing, real-time scheduling, and treatment tracking.
- Integrated APIs such as Lendismart, GusChat, and ActiveCampaign, achieving greater efficiency and workflow automation.
- Increased team productivity by 30% by standardizing processes and Agile tools.

Frontend Developer

Área F5, October 2015 – September 2018

- Built websites using HTML, CSS, and JavaScript (jQuery and Vanilla), with implementations in WordPress and Prestashop.
- Developed a hybrid app using Ionic and Angular, expanding the company's digital offerings.
- Introduced Vue.js in the creation of various landing pages, improving speed and user experience.
